HISTORY

Deeply rooted in tradition and Puritan work ethic, AJD Builders is a standout in the custom home construction industry .

Since 2012, AJD Builders has evolved into a multi-million dollar construction firm, specializing in custom high-end new home buildouts, large additions and remodels. Our mission is to serve as a single-source provider for your home project management, planning, design, engineering, and construction.

At AJD Builders, our Design-Build Model encourages client collaboration in all phases of the construction process. When combined with our team of expert architects, engineers, consultants, estimators and project managers, costs and time are reduced.

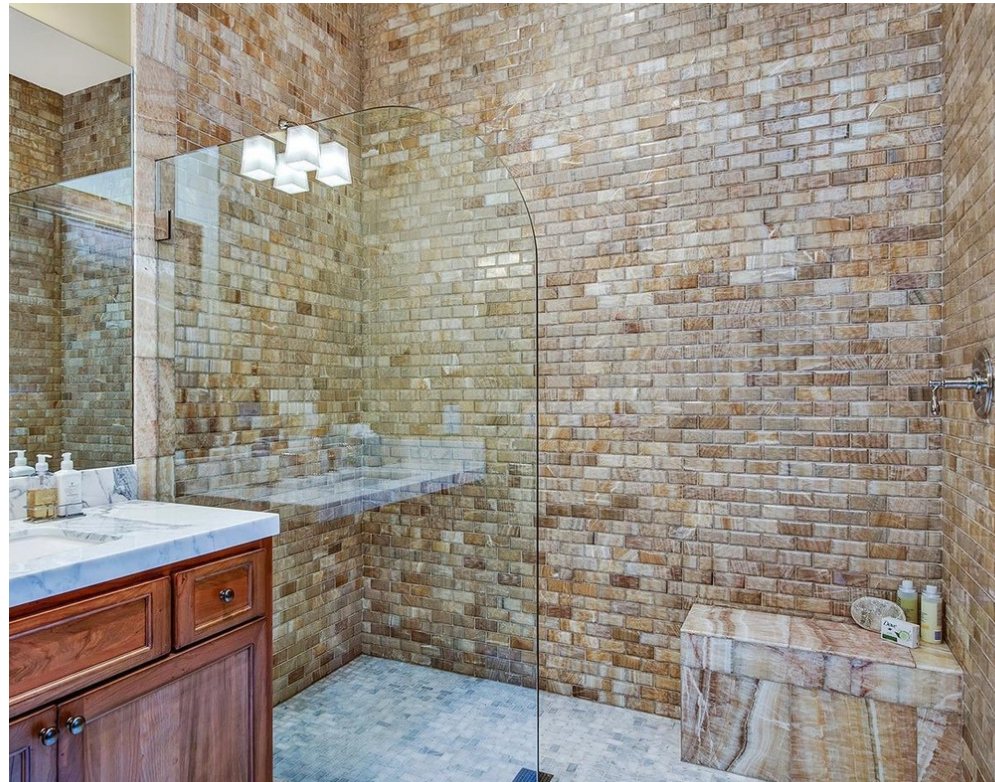

AJD Builders is committed to ensuring all aspects of our construction projects are accounted for and work is fulfilled to our client's satisfaction.

DESIGN BUILD SERVICES

Featuring design-build projects ranging from timeless modern farms to ultra-contemporary designs, our homes are those that inspire their owners to slow down and embrace the space. We take great pride in delivering quality and value to our clients. Our knowledge of construction and development allow us to identify the right team for each project.

A home's entrance must have the right composition, an open floor plan must have the right proportions, and the lighting must be perfect. With the help of our select group of architects, we are able to ensure that design objectives are met. With our experience in procuring the right materials, we are able to bring the design to life, exceeding not only expectations but quality.

Our clients are at the center of each decision we make concerning the design process. The interaction between the design-builder and the client ensures that there is a shared vision; so that goals and expectations are aligned from the start. At AJD Builders we ensure our clients fully understand the scope of work and associated costs, to avoid unexpected surprises.

FULL SERVICE BUILDER

AJD Builders is a custom home builder providing high end quality homes to clients throughout Northern CA, particularly the Riebli Valley. Our services include conducting site evaluations, permitting, design, and construction.

Our vertically integrated approach provides a single source solution for our clients' construction needs. Our services will take your home project from your dream to your reality.

Our services include:

- Site evaluation
- Design
- Permitting approvals
- Green initiatives and smart technologies
- Fire safety technology
- Construction management
- All phases of buildout

When you work with AJD Builders, you can expect a custom home build on time and within budget.

ENGINEERING

A good solid practical engineer is worth their weight in gold. AJD Builders oversees all structural and civil engineering. To create a seamless transition from pre-construction design and budgeting to building, AJD Builders manages all aspects of the design.

Efficiency in structural design is an absolute key component of success for any project. Lack of proper design could result in thousands to hundreds of thousand dollars.

From sizing correct framing dimensions, to selection of the right lumber, and other structural requirements, AJD ensures that both the architect and client's vision of the home is properly rooted in structural design. We even personally price shop structural materials to ensure budgets are inline with design during the pre-construction phase.

These are a few of many examples by which AJD Builders is committed to outstanding concierge engineer services.

FEATURES & TECHNOLOGY

Indoor to outdoor transitional living is a recommended must-have feature in our properties. Large decks, patios, and charming landscaping connect the outdoors with the inside of your home. Custom sliding doors offering access to decks are a part of our signature.

Our properties come loaded with the latest in entertainment, fire, and safety technology. We use top-of-the-line entertainment systems with high-end finishes for aesthetic appeal. In addition, we offer quality brands such as Lutron lighting, Sonos audiovisual programming, and Alexa/Siri voice-activated controls that provide homeowners with an exceptional sense of safety and security.
